Software Engineering apprentice at Careerfoundry looking to become a Full-Stack Developer in the Philadelphia/DC area. Javascript-focused developer honing skills in C#. Seeking a workplace that is collaborative and fast-paced, while promoting a healthy environment of work-life balance. Ideal employer would value innovation and employee contribution towards projects. As an employee, I value opportunities for advancement & job security. I am an Insurance Broker with 4 years of experience working with clients in the Middle-Market sector and have decided to pivot my career towards software engineering to create applications that make more of a tangible impact to the clients I serve. With my experience with insurance and consulting, I can bring a risk management approach to programming to help protect consumer and company data, while having the soft-skills to effectively communicate with clients.

Technologies and Languages

- Languages: HTML, CSS, Javascript, C#
- Technologies: MongoDB, Express, Node.js, React.js, Bootstrap
- Soft skills: Goal setting, public speaking, customer service
- Interests: Basketball, weight-lifting, kdramas, anime, self-help books, and electronic music duo Honne

Projects

AnimeFlix

- Developed a scalable, single page application for 10+ users to login, sign-up, and view info about their favorite Anime movies.
- Created with MERN stack and implemented CRUD functionality, JSON web-token authentication, and password hashing.
- Utilizes a RESTful API to store and display movie and user info.

Pokedex App

- Application built using HTML, CSS, Javascript, and Bootstrap that loads data from an external Pokemon API, featuring a functional search bar.
